The brand new Bluetooth stereo Intercom for conversations on two wheels, up to 4 bikers

Pure and uncompromising technology at the service of the most demanding Bikers: the new **Midland BT Next** is the leader of the pack of a new generation of **Midland** Bluetooth Intercom Systems designed to communicate on two wheels.

Midland BT NEX T is a stereo Bluetooth Intercom for **Multi-Biker conversations in full duplex, up to 4 bikers**, with a range of 1.6 km; it comes equipped with integrated FM radio with RDS and offers standard Bluetooth connections to cell phones, stereo MP3 players, and a GPS system together with Intercom "Pilot2Passenger" and "Biker2 Biker" Intercom.

Midland BT NEX T is equipped with cutting-edge Bluetooth technology, **DSP** (Digital Signal Processing), **AGC** for automatic volume control according to background noise, **voice status messages**, and battery charge. Thanks to the VOX function, the Intercom connection and telephone answering function are voice activated.

With foldable antenna, compact, ultra-flat and aerodynamic, the **BT NEXT** device is equipped with three practical buttons that can easily be felt and used even while wearing gloves, without compromising driving safety.

Like all the Midland BT line devices, the **BT Next** is equipped with a jack outlet for wire connections with stereo MP3 and PMR446 transceivers for **group conversations among several bikes** up to a distance of 5km.

Midland BT NEXT devices are easily installed and compatible with all types of helmets, thanks to the installation kit included that contains a clip-on clamp and a double-stick attachment.

The audio kit comes equipped with two thin stereo speakers and two interchangeable microphones “wired and with a flexible arm”, both of which can easily be installed into the helmet with Velcro.

Midland BT NEXT can also be programmed via USB for quick Web updates and for system configuration. The polymer lithium battery guarantees up to 10 hours of conversation, while status vocal messages from the device allow the user to easily check the charge level of the battery.

Midland BT NEXT is compatible with all Midland BT Line Intercom devices.

COMPLYING TO CE/99/05

Main features:

- **Intercom** up to 4 connections
- **Long distance** up to 1.6km
- **Can be used with** cell phones, GPS and MP3 devices with integrated Bluetooth
